SUMMARY

Full-stack developer specializing in the MERN stack and Next.js. Experience shipping production client websites, headless CMS integrations, and real-time applications, from React/Next.js frontends to Express/MongoDB APIs. Focused on writing clean, maintainable code that ships on schedule.

EDUCATION

Jaypee University of Engineering and Technology

2023 – 2027

B.Tech - Computer Science and Engineering

Guna, Madhya Pradesh

EXPERIENCE

Web Developer Intern — GoDigital Agency

June 2026 – Aug 2026

Next.js, React, TypeScript, Sanity CMS, Tailwind CSS

- Shipped production client websites including GoDigital Agency's own site and the **Jiya JR** e-commerce site using **Next.js 16**, **React 19**, and **TypeScript**, with 3D and motion driven UI built on React Three Fiber, Spline, and GSAP.
- Built headless **Sanity CMS** backends with custom schemas and Portable Text content rendering, letting clients update pages without touching code.
- Configured **Vercel** deployment pipelines with custom domains and DNS, and integrated Zustand state management, Framer Motion animation, and Resend-powered transactional email across client sites.

Full Stack Developer Intern — BJJewelry.in

Jan 2026 – Mar 2026

Next.js, TypeScript, Supabase, Tailwind CSS, Figma

- Built a full-stack B2B jewellery platform with 100+ products using **Next.js** and **Supabase**, optimizing rendering and component architecture to improve page load performance by 30%.
- Implemented a **Sanity CMS**-powered admin dashboard and CSV/Excel export functionality for efficient product management and data reporting, while designing production-ready UI/UX prototypes in **Figma**.

PROJECTS

Realtime Chat App  | [MERN Stack](#), [Socket.io](#), [JWT](#)

Nov 2025

- Built a full-stack real-time chat application with instant messaging and live online-status presence using **Socket.io**, **Express**, and **MongoDB**.
- Implemented secure authentication with **JWT** and bcrypt-hashed passwords, and integrated **Cloudinary** for profile and media uploads.
- Built the frontend in **React 19** and **Vite** with **Zustand** for state management, React Router for navigation, and Tailwind CSS for styling.

E-Commerce Jewellery Store  | [Next.js](#), [TypeScript](#), [Prisma](#), [PostgreSQL](#)

Jan 2026

- Built a full-stack e-commerce website using **Next.js**, **TypeScript**, and **Prisma** with **Supabase PostgreSQL**, featuring a product catalog, cart, checkout, and secure user authentication with **NextAuth**.
- Built a **Sanity CMS** admin panel for managing products and content, allowing non-technical users to update the store without code changes.
- Improved search visibility with **SSR**, structured metadata, and image optimization using **next/image**, and deployed to production on **Vercel** with domain connection.

TECHNICAL SKILLS

Languages: C, C++, JavaScript, TypeScript

Frameworks & Libraries: React.js, Next.js, Node.js, Express.js, Tailwind CSS

Databases: MongoDB, PostgreSQL, Supabase, SQL

Tools & Platforms: Git, GitHub, Vercel, Sanity CMS, Figma
